PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented full-stack developer with 2 years of experience in backend development, REST API integration, and blockchain-based DApp solutions. Skilled in Node.js, Express, MongoDB, React.js, and Web3.js, with a strong focus on building secure, scalable, and high-performance applications.

WORK EXPERIENCE

CLARISCO - Blockchain, AI & IoT Software Development Company - Madurai

Back-End Development

June 2023 - June 2025

- Designed and secured **RESTful APIs** using Node.js, Express.js, and MongoDB, implementing **JWT authentication, email OTP, and Google OAuth** with HTTP-only session cookies for secure user login and session handling.
- Implemented robust logging and error handling using Morgan, **Winston**, and Express **middleware** to capture API logs, errors, and request flow—reducing backend **debugging** time by over **30%**.
- Developed custom logic in **API routes** to handle user actions, conditional flows, and **blockchain**-related operations; integrated **Web3.js** for **Ethereum** transactions using private keys and operator address handling.
- Reduced API response time by **30%** by optimizing **MongoDB** queries and indexes.
- Handled backend deployment using **AWS** server access via **FileZilla**, deploying Node.js and React apps remotely and verifying live issues for quick patch fixes; maintained clean environment setup and version control.

Front-End Development

June 2023 - June 2025

- Developed and optimized scalable React applications using functional components, **React Router, Context API**, code splitting, and lazy loading—resulting in a **25%** improvement in initial load time and overall performance.
- Integrated **RESTful APIs** and blockchain protocols using **Web3.js** and **Ethers.js** to enable Ethereum wallet connections (**MetaMask**), transaction tracking, and smart contract interactions on the frontend.
- Built and validated dynamic forms using **Formik, Yup, and React Hook Form** with real-time validation, error handling, and user-friendly feedback to improve submission accuracy and UX.
- Implemented responsive UI using **HTML, CSS, Bootstrap**, and media queries, ensuring consistent cross-device behavior and contributing to a **30%** boost in mobile usability and engagement.
- Collaborated in Git-based workflows (pull requests, branch merging, **conflict resolution**), identified and resolved frontend bugs, and reduced UI issues in production by over **20%**, improving deployment stability.

TECHNICAL SKILLS

- Frontend**: HTML5, CSS3, JavaScript (ES6+), TypeScript (familiar), React.js, and Web3.js.
- Backend**: Node.js, Express.js, Web3.js, Java (Intermediate), REST API.
- Database**: MongoDB, Mongoose, MySQL (Intermediate), Sequelize (ORM).
- Tools & platform**: Visual Studio, GitHub, Git, Remix, FileZilla, and Postman.

EDUCATION

SACS MAVMM Engineering College

Jun 2015 - July 2019

BE - Electronics And Communication Engineering, CGPA : 6.5

CERTIFICATION

Kalvi Computer Education

- Java

Dec 2022 - Mar 2023
